

Label the equation using the correct terms (divisor, quotient, dividend):

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Divide. Use the strategy that you like best! (Place Value Boxes, Expanded Notation, or Digit by Digit)

1. $378 \div 7 =$

6. $3,003 \div 45 =$

2. $567 \div 5 =$

7. $2,309 \div 17 =$

3. $6,546 \div 3 =$

8. $2,423 \div 11 =$

4. $7,307 \div 2 =$

9. $1,512 \div 23 =$

5. $6,911 \div 6 =$

10. $4,508 \div 28 =$

11. There are 7,984 feet in a Gillespiemeter. There are 4 feet in a Erinmeter. How many Erinmeters are there in a Gillespiemeter?

12. My chickens laid 5,926 eggs last month. I sell them in cartons by the dozen. How many cartons of eggs did my chickens lay?

13. Complete the FRACTION BOX:

$\frac{2}{5}$ and $\frac{5}{9}$

>	
+	
-	

x	
----------	--

14. Solve. *Hint: You are dividing by a power of 10!*

$$1,294 \div 100 =$$

$$7,964 \div 1,000 =$$

$$755 \div 10 =$$
